- Himalayan Marinade

Himalayan Salt is 100% Natural, Pure, Original, Genuine & Contains 84 "Natural" Elements needed by the body. Pink Himalayan salt is a pink-colored salt extracted from the Khewra Salt Mine, which is located near the Himalayas in Pakistan. The pink Himalayan salt harvested from this mine is believed to have been formed millions of years ago from the evaporation of ancient bodies of water. Its contain up to 84 different minerals and trace elements. In fact, it's these very minerals, especially iron, that give it its characteristic pink color

HIMALAYAN EDIBLE SALT

**Dark Pink Himalayan Salt
available in all sizes**

Himalayan Dark Pink Salt is the purest form of salt available on planet Earth . It is carved out from decades-old, naturally occurring salt reserves at the bed of the giant Himalayan mountains in Pakistan The reddish-pink appearance of our pink salt proves its purity. This coarse salt contains up to 84 essential minerals that are Beneficial for the human body in daily nutrition.

HIMALAYAN EDIBLE SALT

**Black Himalayan Salt
available in all sizes**

Black Himalayan Salt, also known as kala namak goes by many names. It is a salt rich in sulfur which accounts for its pungent, rich, egg like taste and is used as a condiment in Pakistan snacks, salads, fruits and soups. Chefs use Black Himalayan to imitate and enhance the taste of eggs, and when ground, the color shades between purple and pink. Like other Himalayan Salts, kala namak is believed to possess numerous health benefits.

HIMALAYAN Livestock

Animal Lick Salt

Himalayan pink salt licks are 100% natural products created for cattle as well as horses

Benefits

- Decreases stressful behaviors
- Strengthens immune system
- Helps animals develop shiny & healthy coats
- Increases feed intake
- Increases animal weight
- Increased farm efficiency & productivity

HIMALAYAN Industrial Salt

Oil Refinery Grade Salt

Industrial grade Salt is used in Oil Refinery Industry and Petrochemical Industry. In Oil Refineries, Refiners use Rock Salt to dry distillate cracked product streams. Salt has the capacity to reduce product haze point. when direct stripping steam from the stripper column is released the hydro desulfurization units for jet and diesel require coalesce and salt dryer. The salt dryer completely avoids product off specification in water and appears hazy.

Deicing Salt 2-10mm High Purity Salt

When applied to snow or ice, salt lowers the melting point of the mixture. Thus, large amount is used in Northern climate to rid streets of accumulated snow & ice.

Salt For Water

Salt is used for treating potable water (drinking water) to remove hardness or softened by using ion-exchange resins. Ion-exchange resins to soften the water prior to being used in the boilers and for industrial & commercial applications.
